Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-10 have been renumbered 30-39.

Allowable Subject Matter

Claims 30-39 are allowed.

The following is an examiner's statement of reasons for allowance:

The most relevant prior art uncovered during search is that of Bateman et al. (US Patent No. 6,229,142). The instant application is distinguished over the Bateman et al. reference primarily in that Bateman et al. discloses plural collection electrodes of differing size (36, 38, and 39), but does not teach the alteration of the portion of electrons collected on these electrodes by modifying an electrical potential applied thereto, a magnetic field applied thereto, or by virtue of the geometry of the flight tube. The number of particles incident on the electrodes of Bateman et al. directly correspond to the size of the electrodes. Accordingly, the prior art and Bateman et al. therefore does not teach or suggest the invention recited in claims 30-36.

Claims 37-39 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
